# Printing Truer Black and White Images for DTG
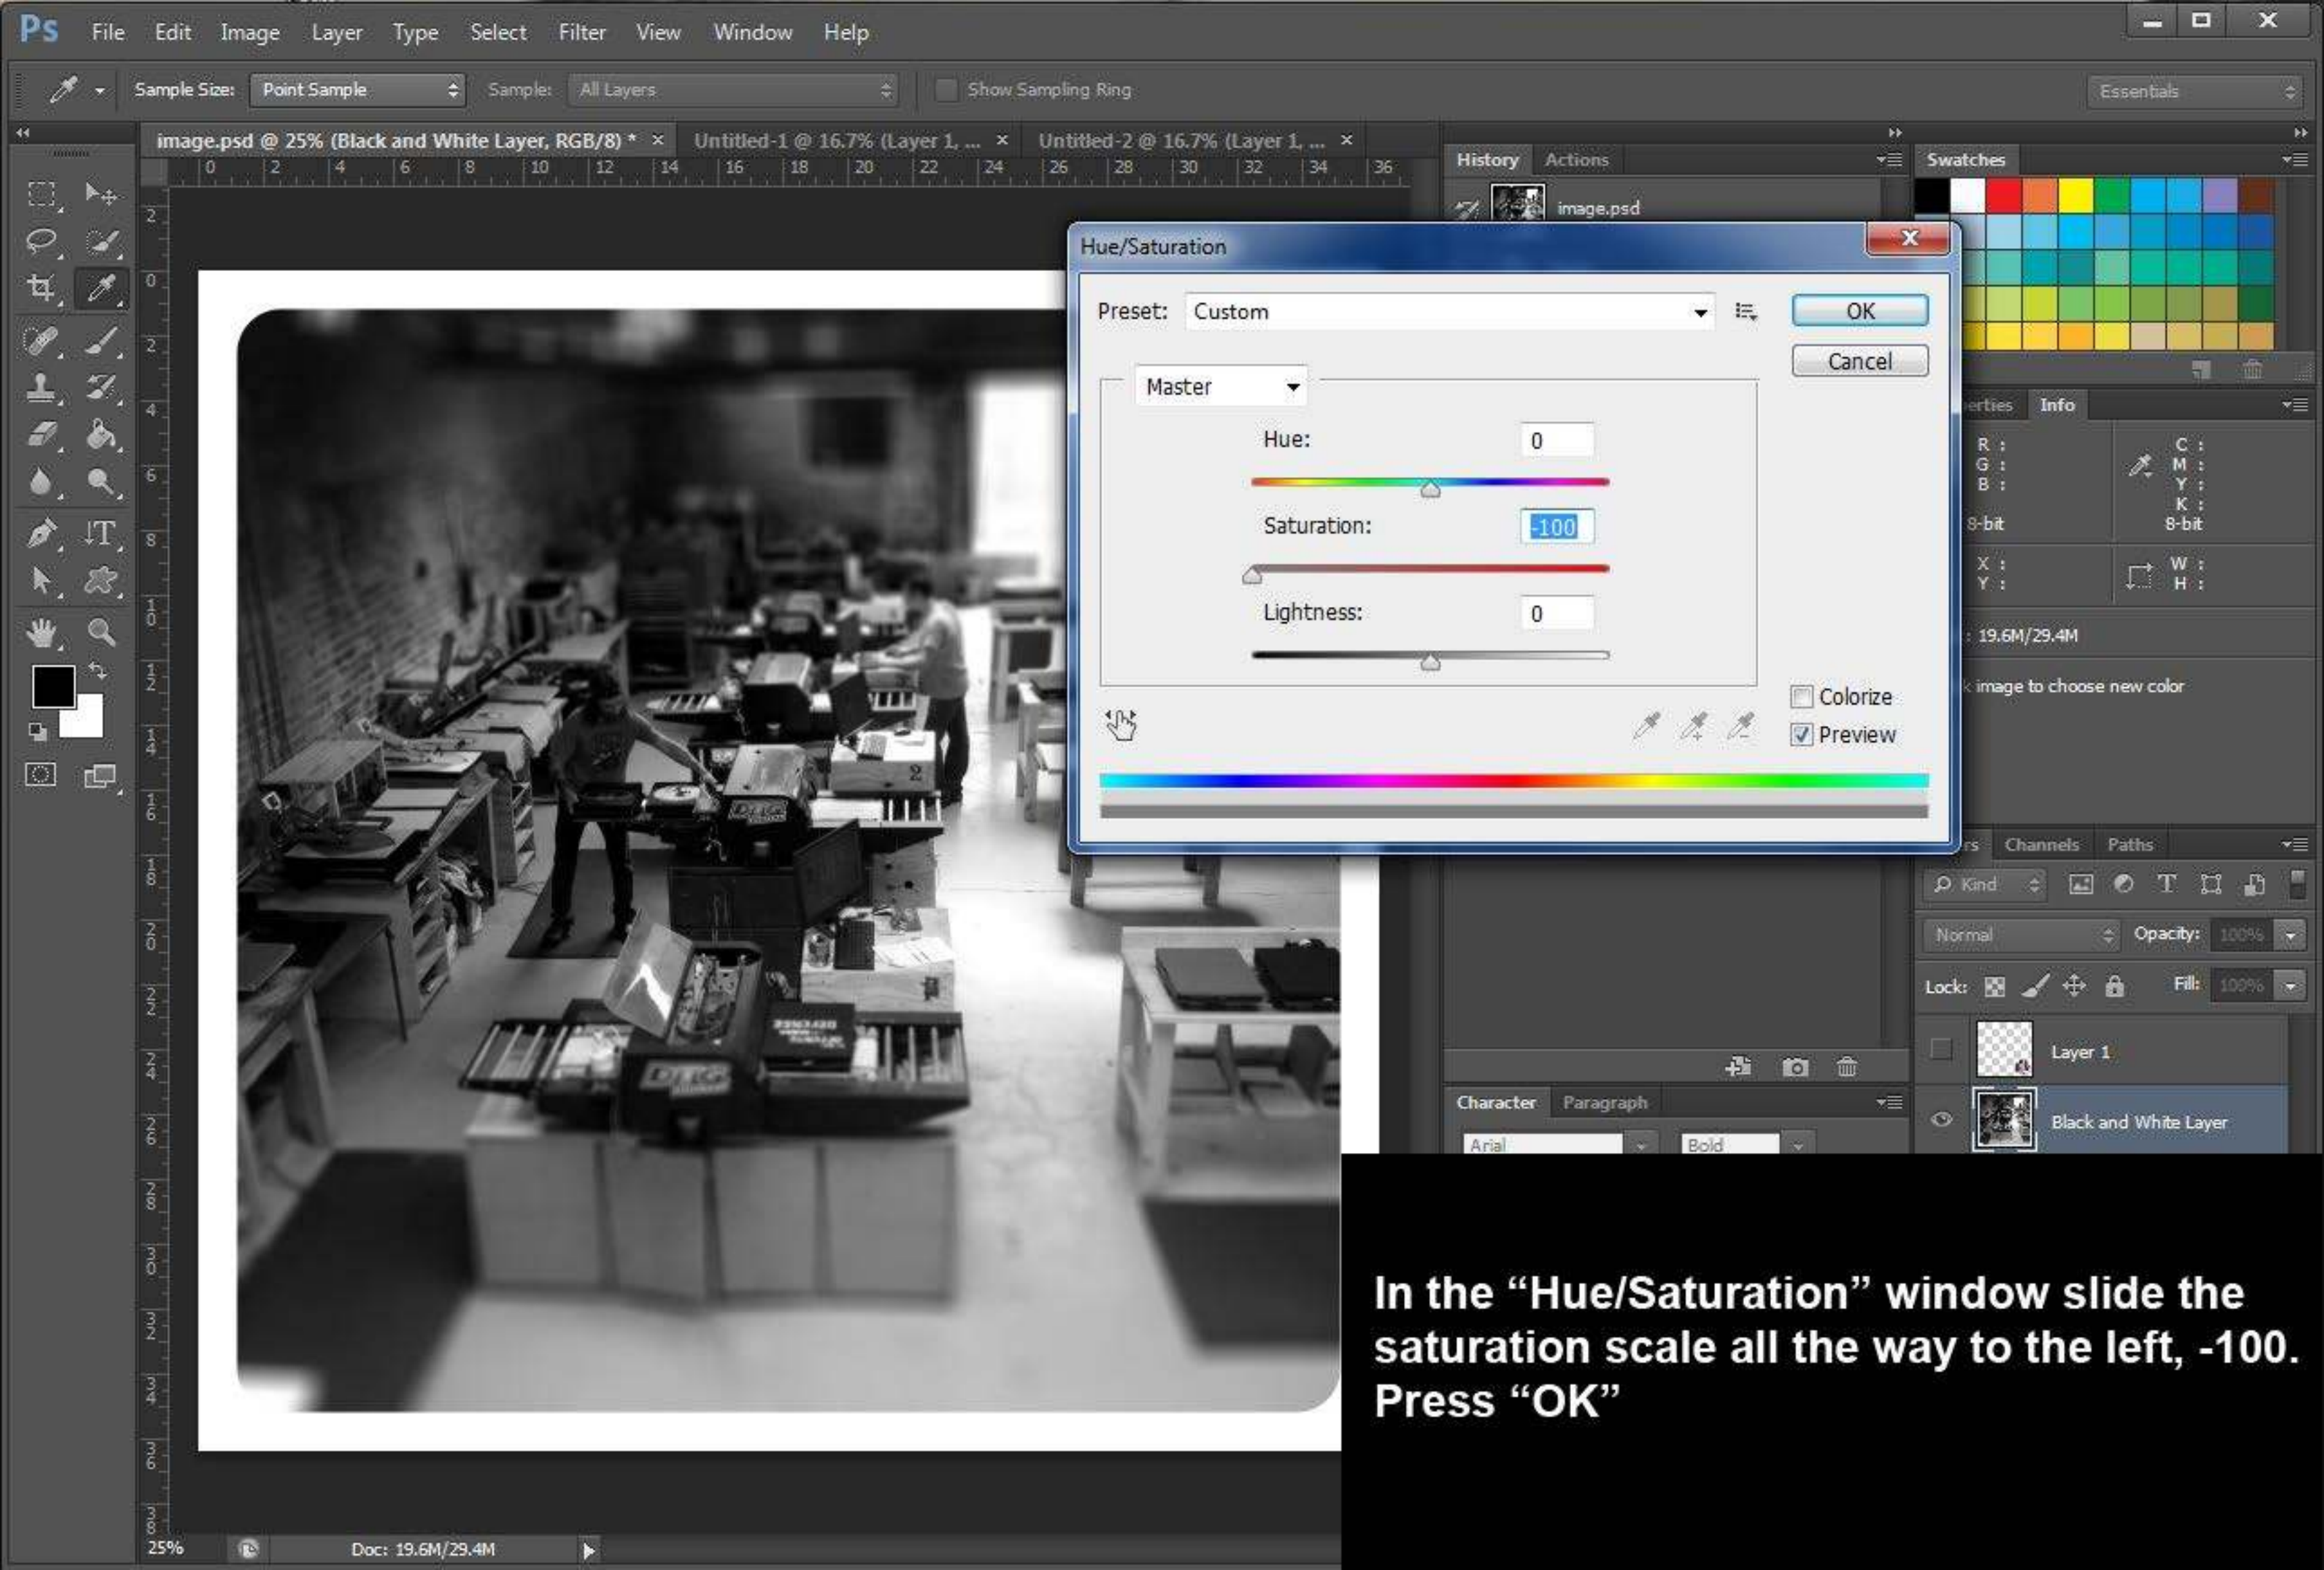

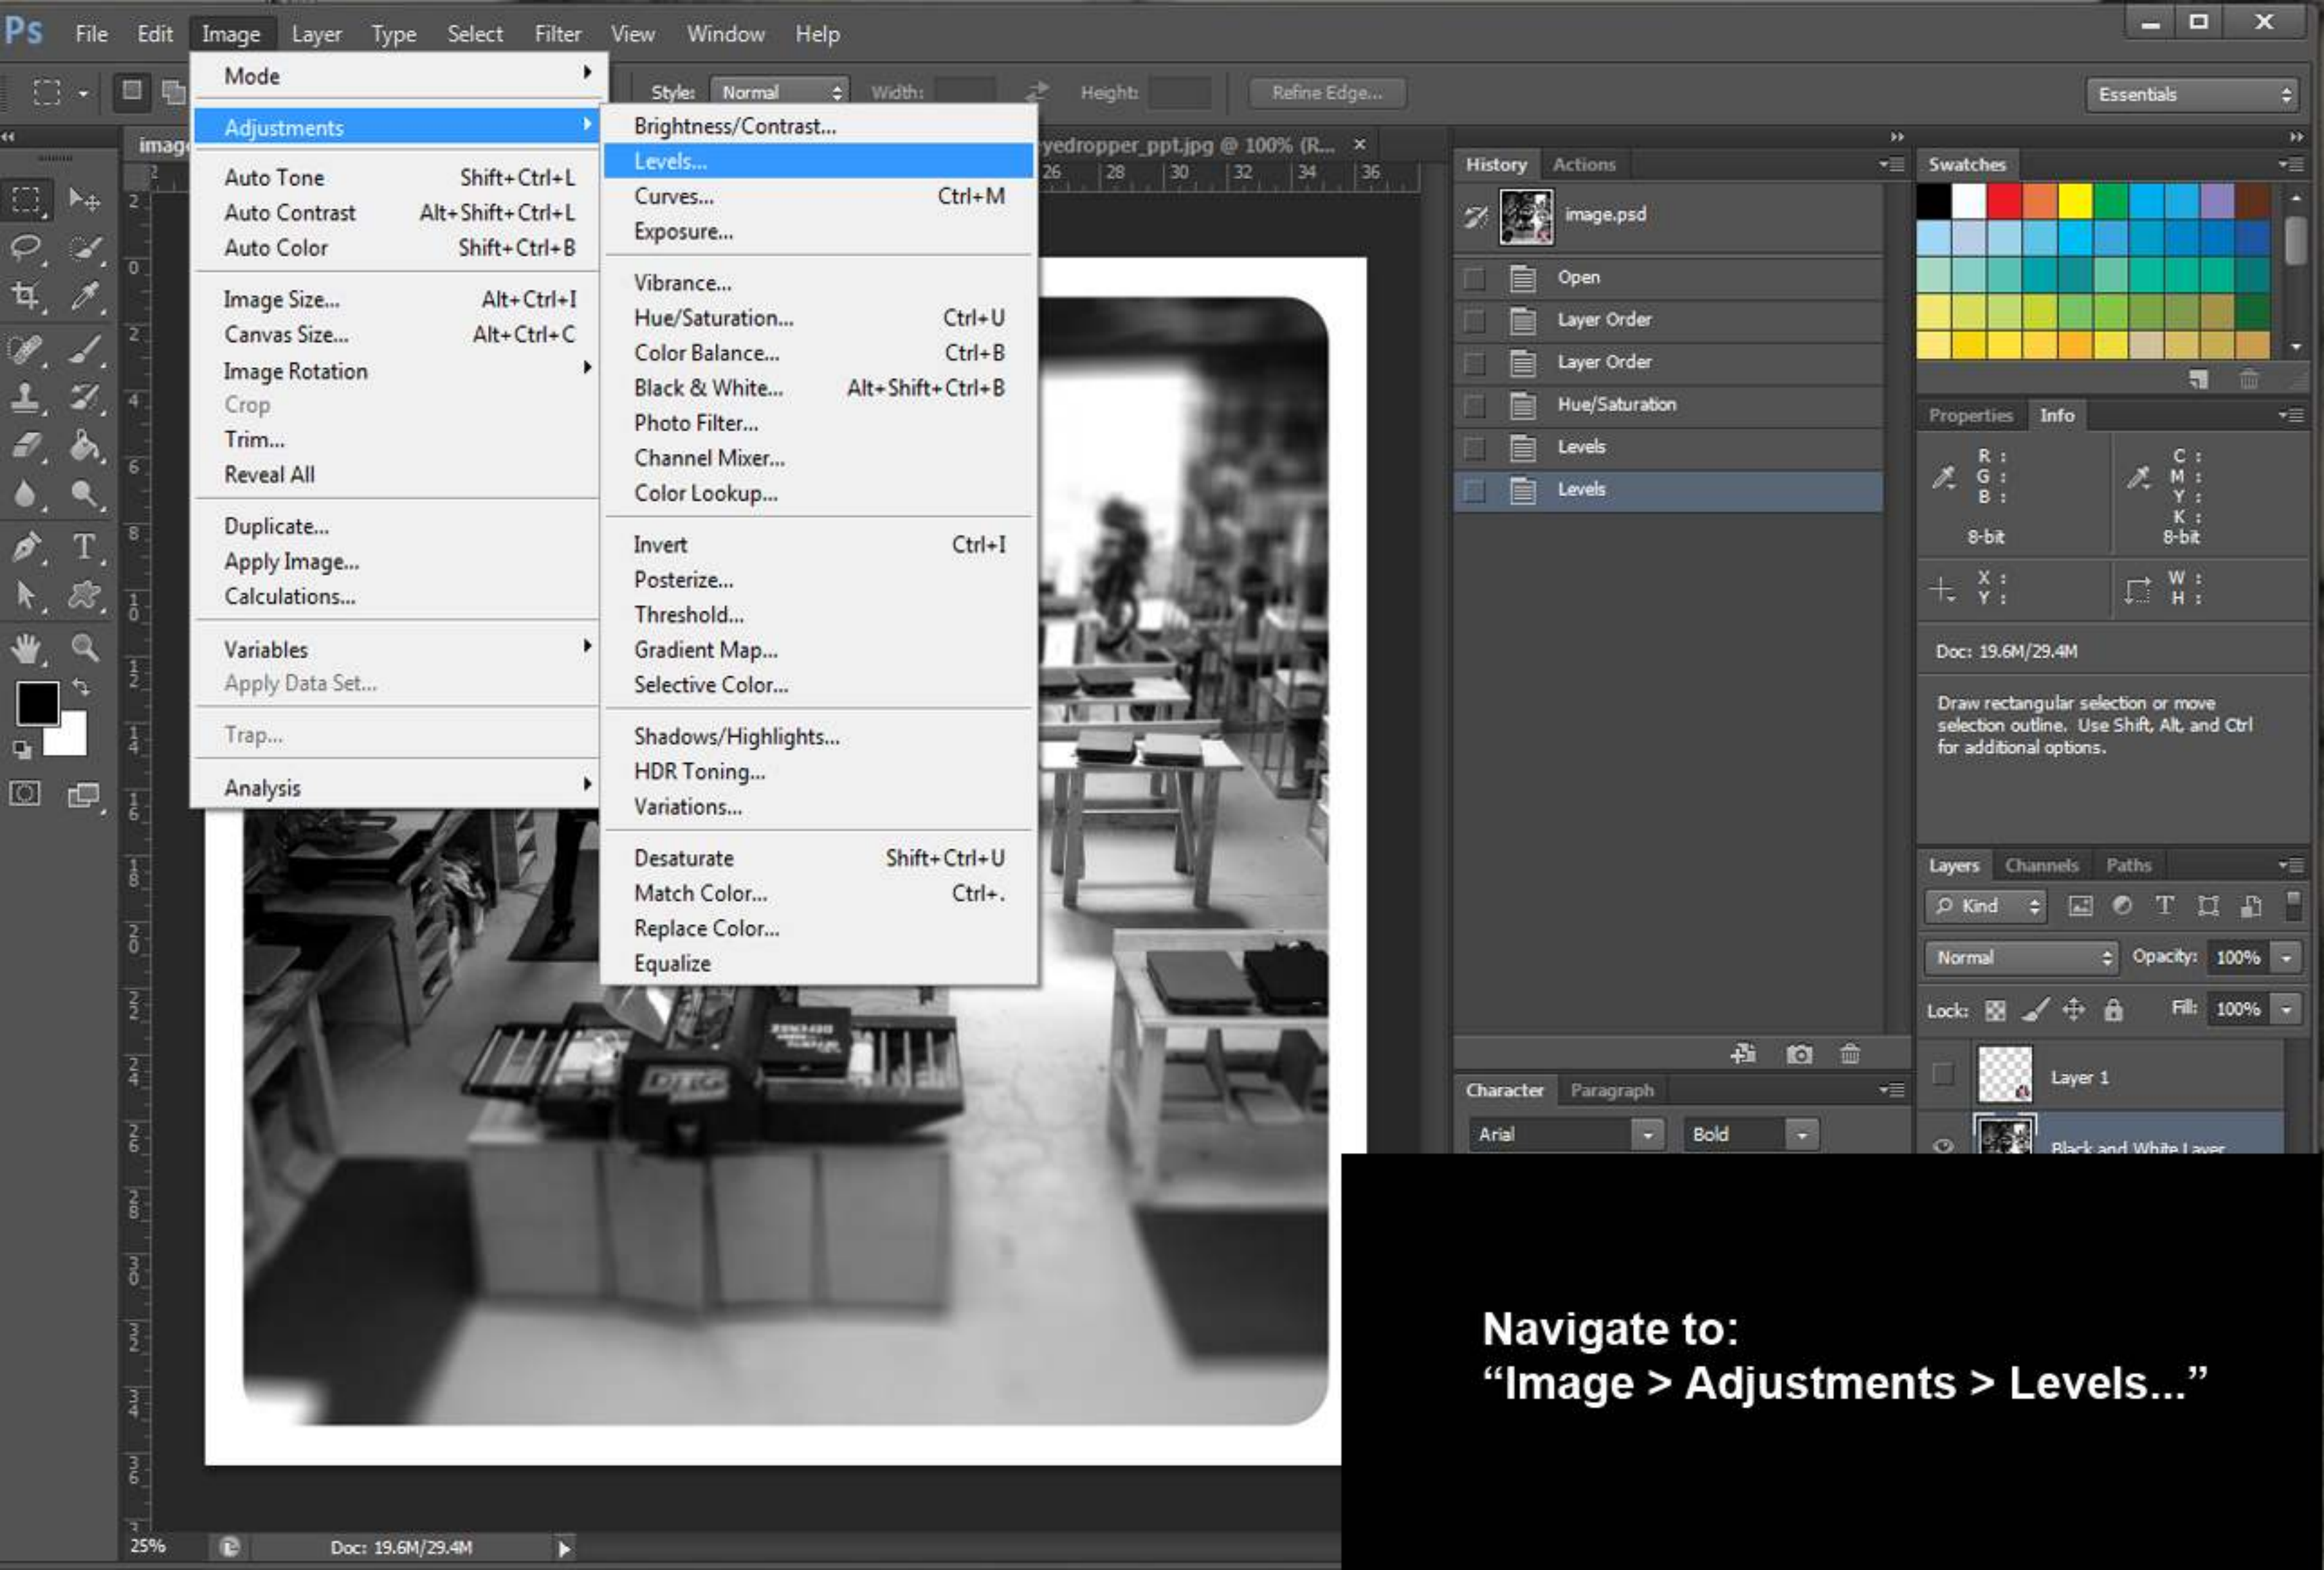

Begin with only having the
black and white layer selected

Turn off all layers but the black and white layer. In the top menu bar navigate to "Image > Adjustments > Hue/Saturation..."
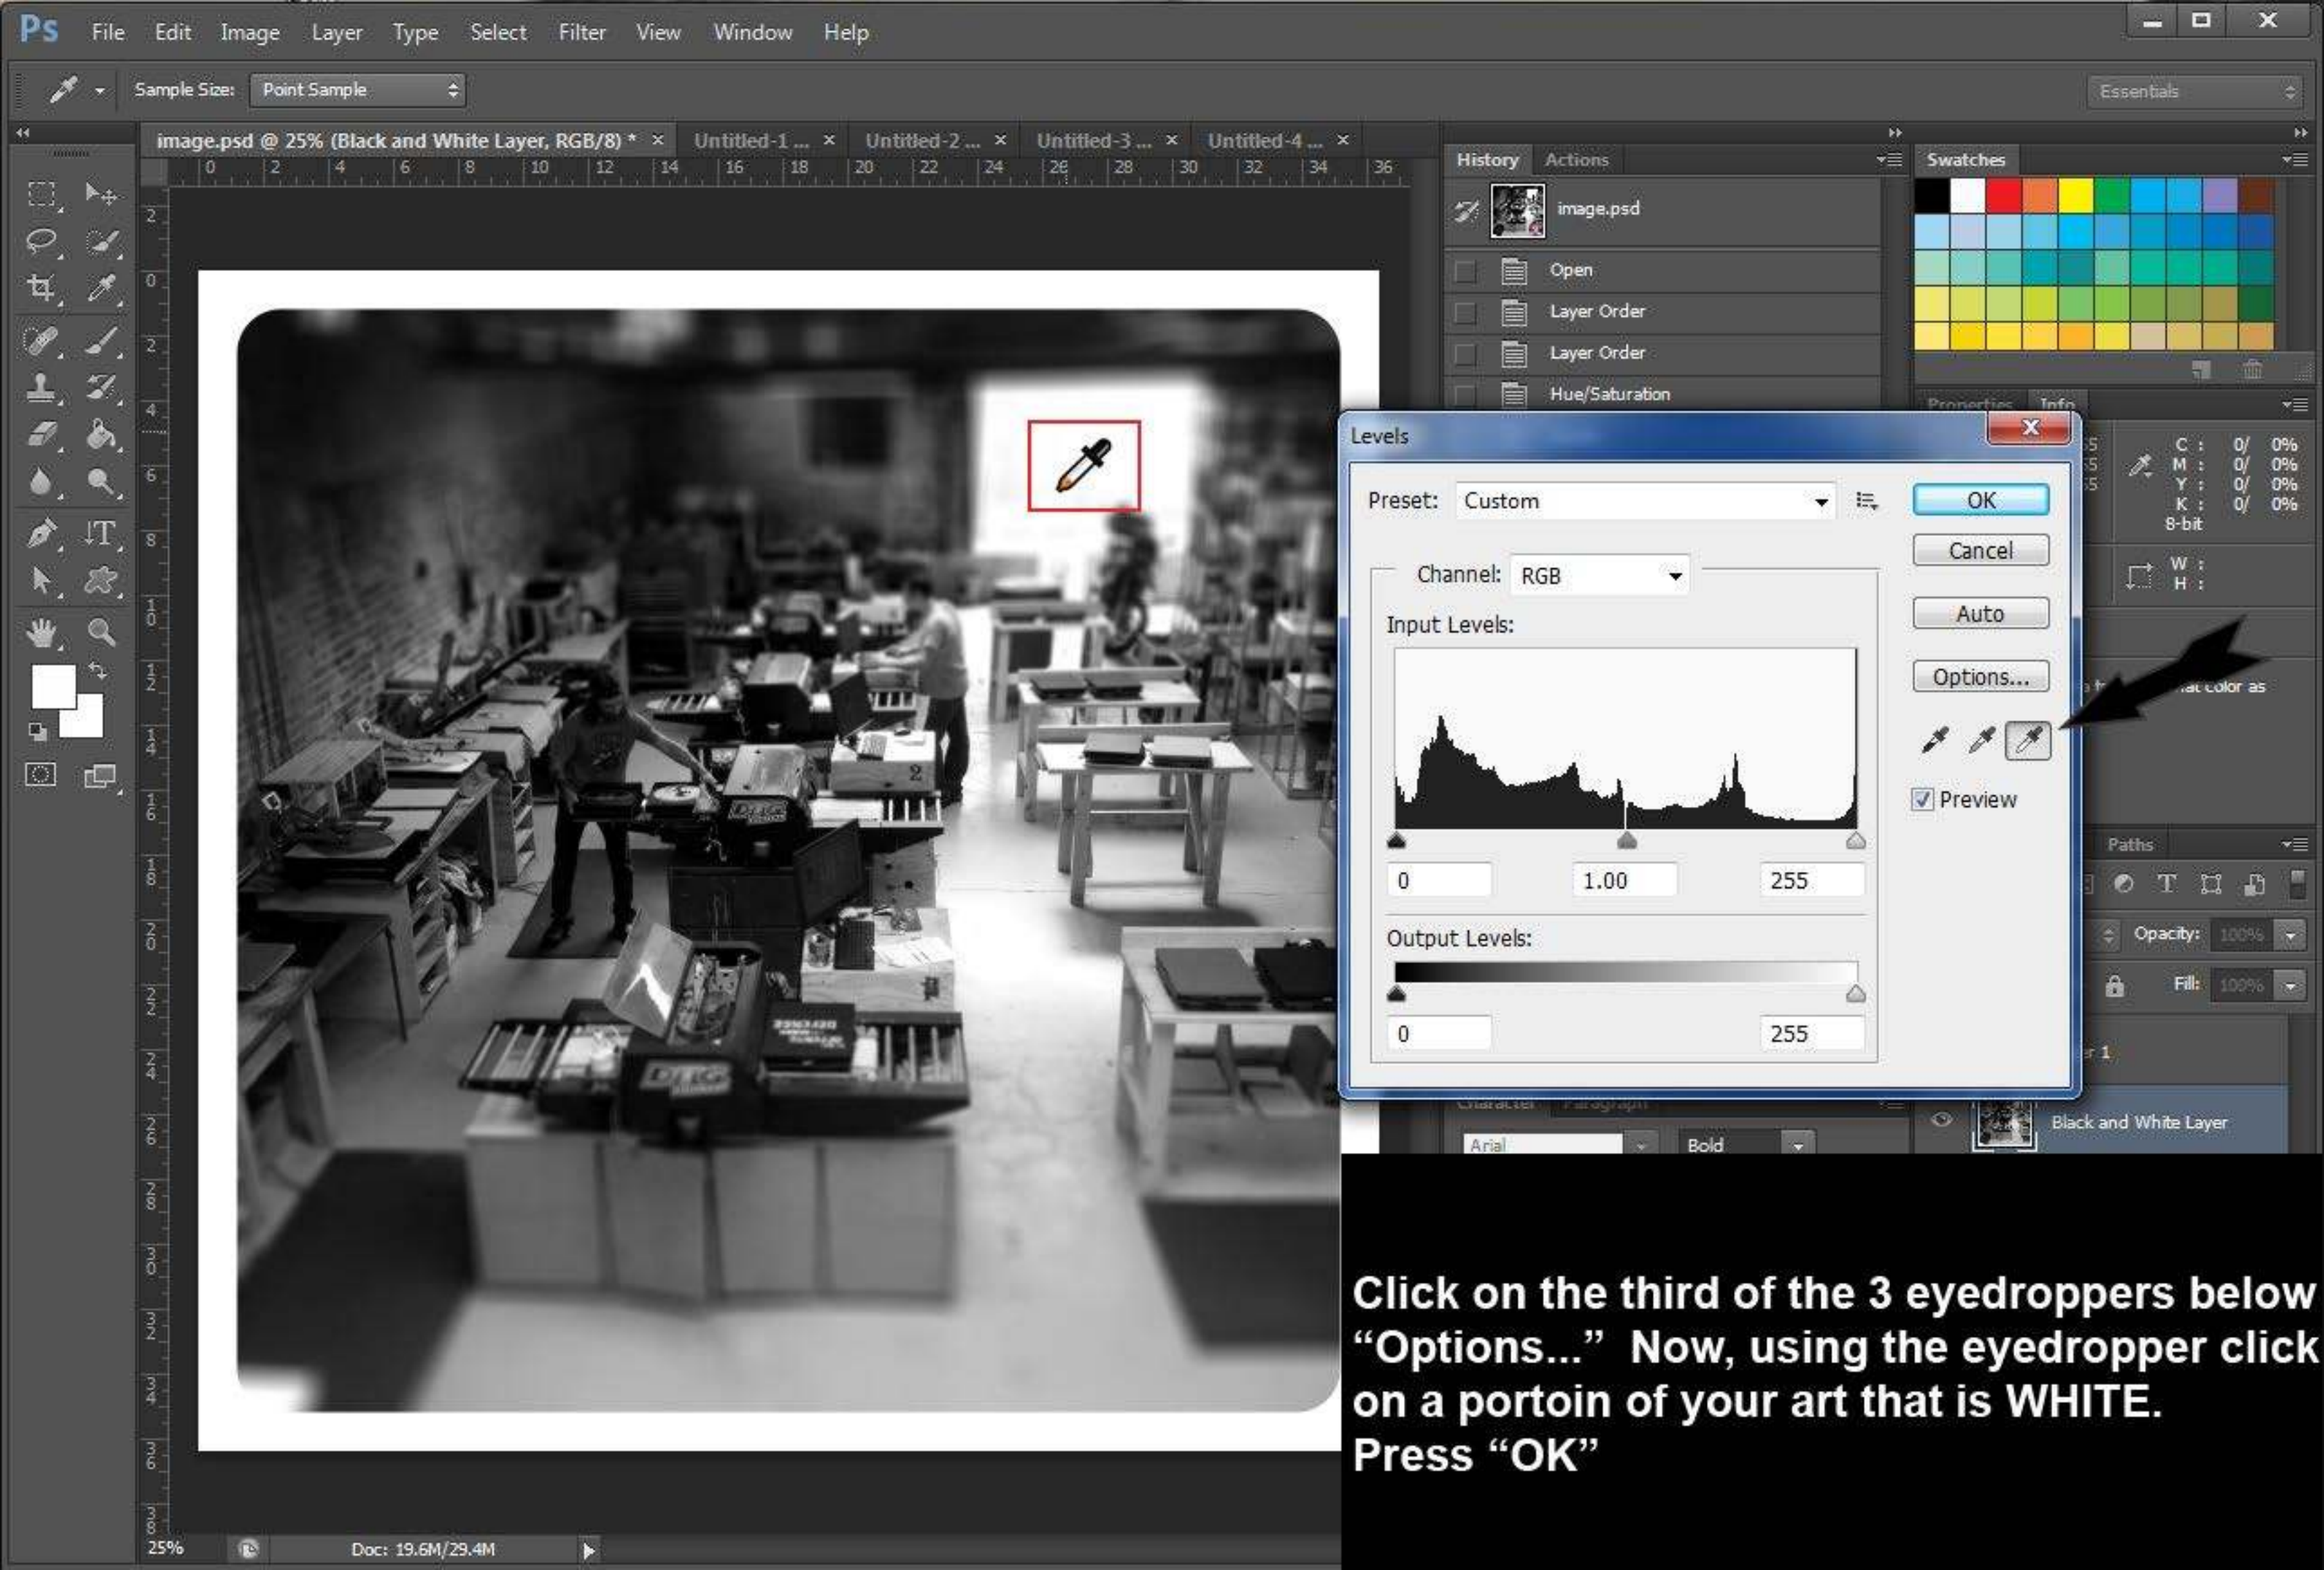

In the "Hue/Saturation" window slide the saturation scale all the way to the left, -100. Press "OK"
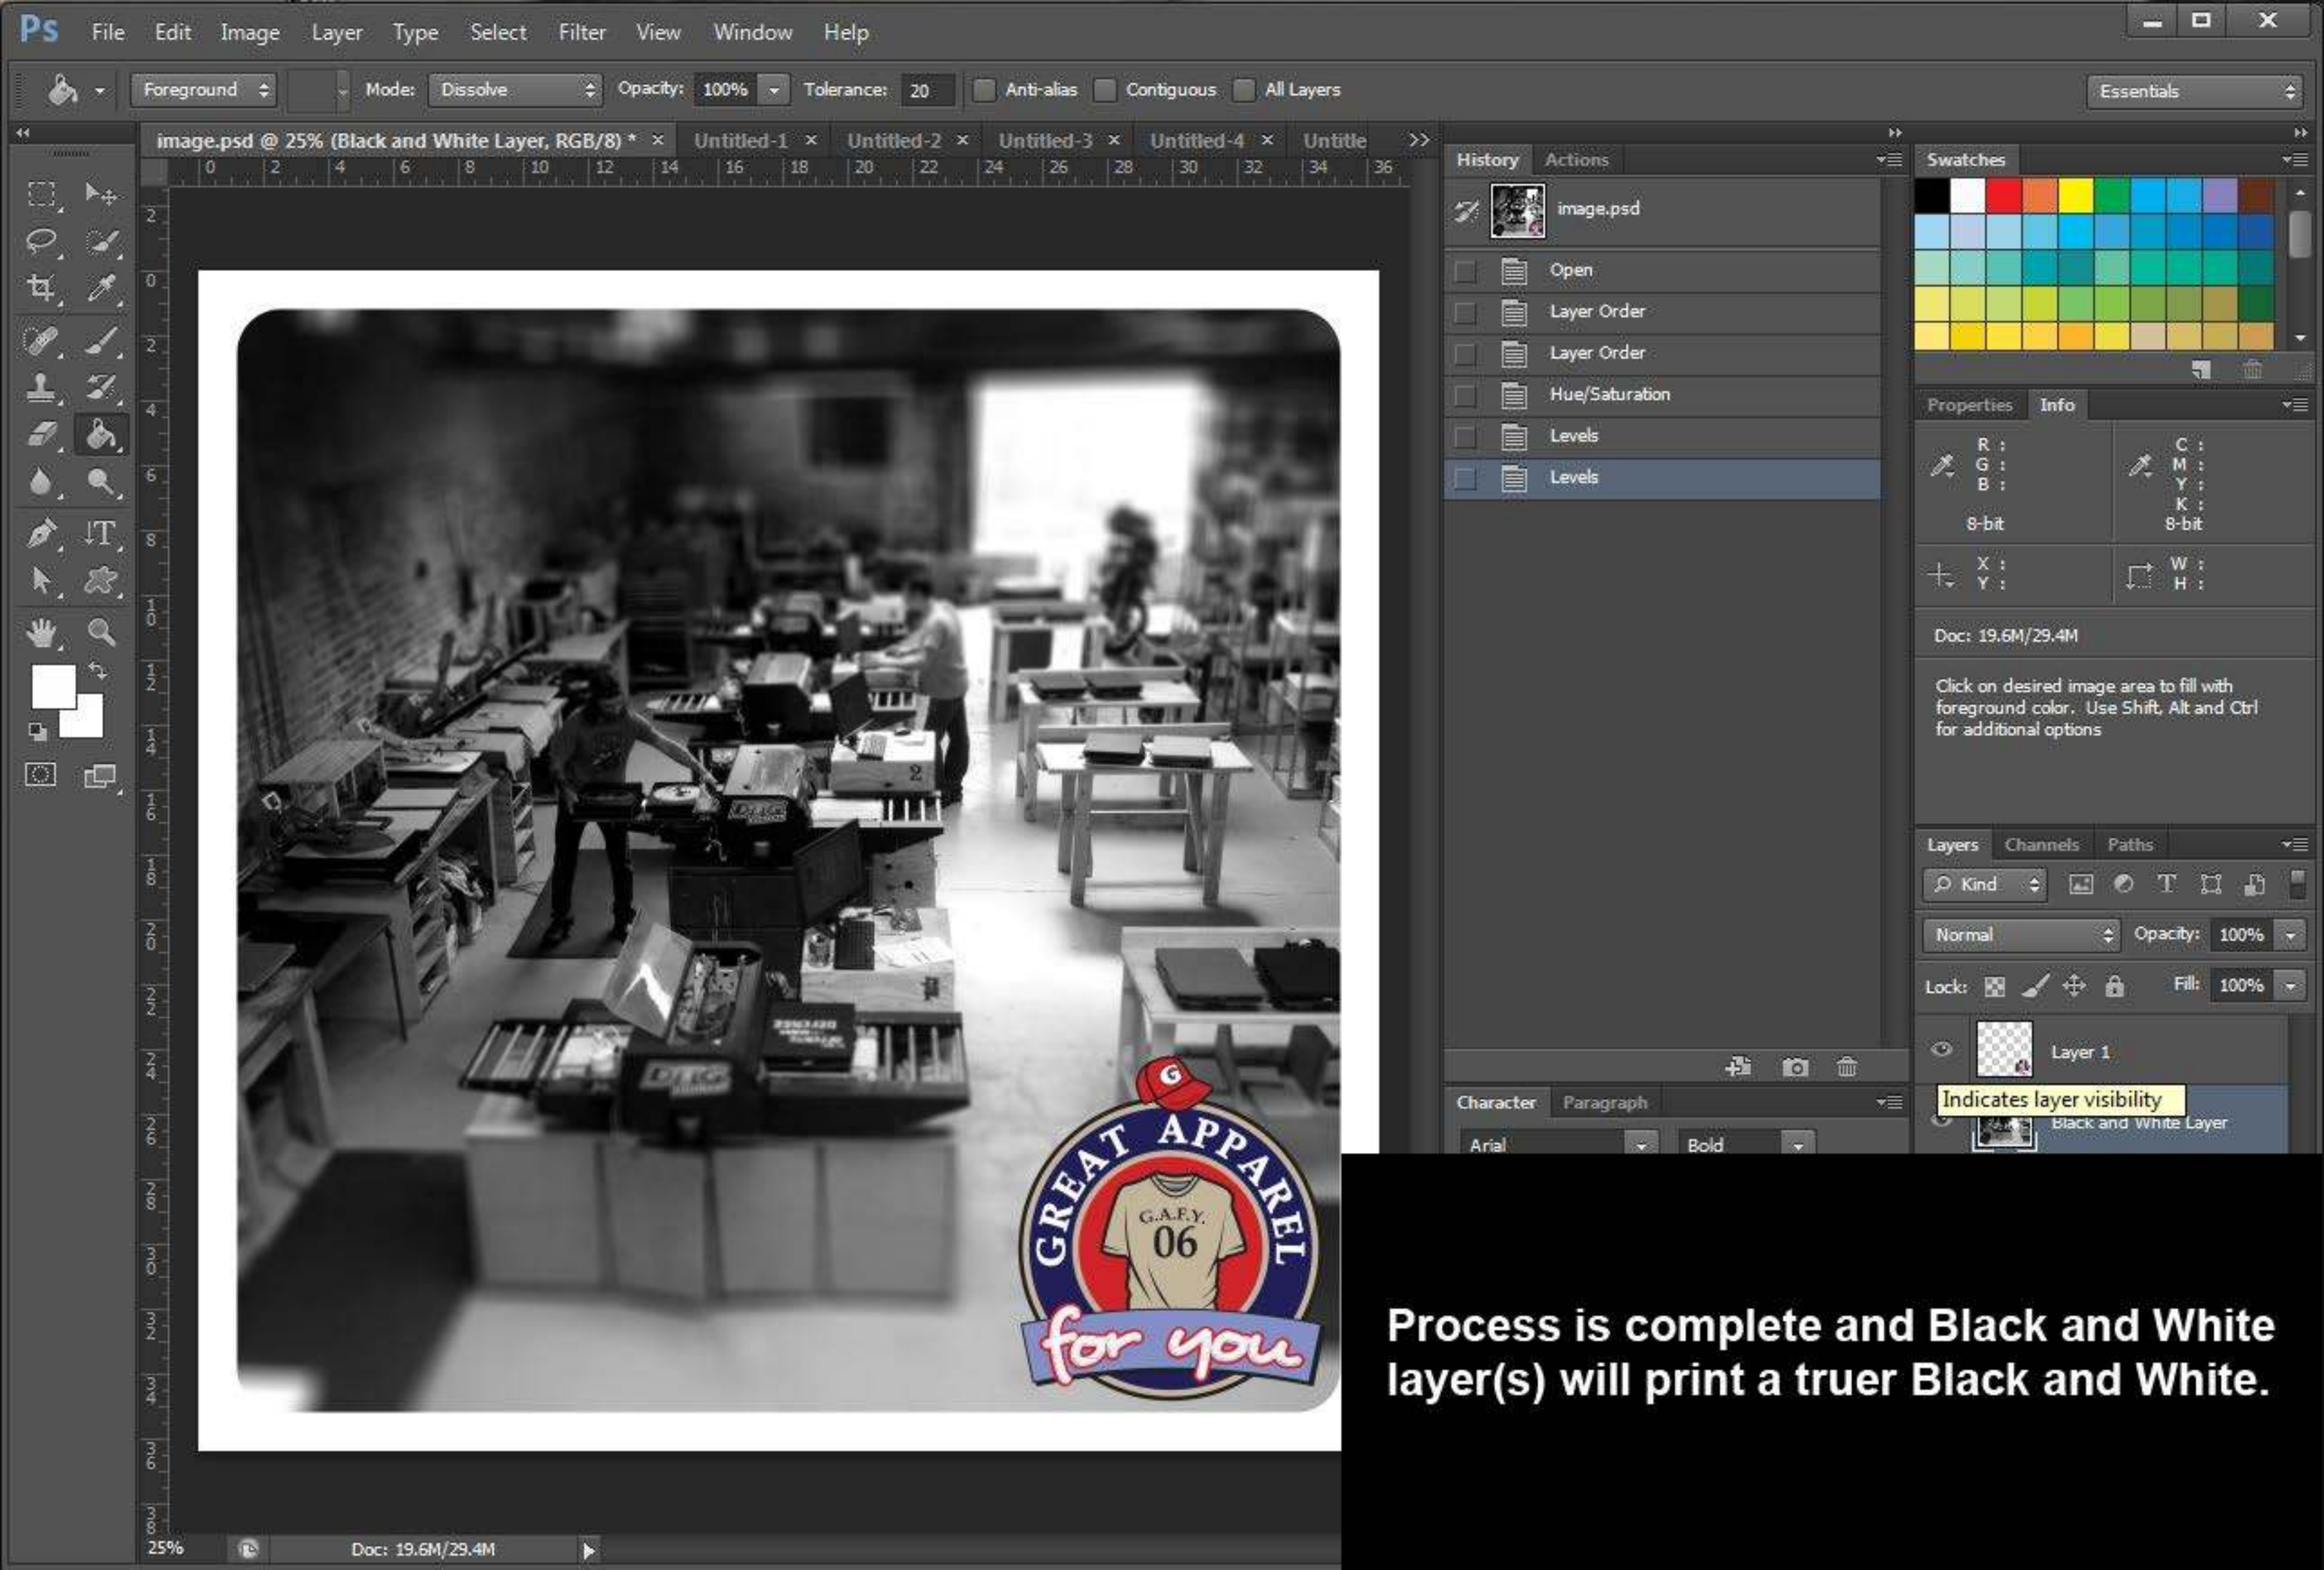

Navigate to:
"Image > Adjustments > Levels..."

Click on the first of the 3 eyedroppers below "Options..." Now, using the eyedropper click on a portoin of your art that is BLACK

Click on the third of the 3 eyedroppers below "Options..." Now, using the eyedropper click on a portoin of your art that is WHITE. Press "OK"

Process is complete and Black and White layer(s) will print a truer Black and White.
